Montana Agricultural Statistics Districts

About the Cover

The elevator on the cover was located in Vandalia, Montana, and is no longer standing. Elevators like this once dotted Montana's countryside but are now scarce. Today a 110-car train can arrive at a modern, high speed loading station and as few as three people can load the train in 12 to 15 hours. With the newest station located in Moore, Montana now has 14 of these loading facilities that can handle 110-car trains.

.....

The cover was designed by Bonnie Heller. Bonnie was killed on September 23, 2008 in a tragic auto accident. The 2008 Montana Agricultural Statistics Bulletin is dedicated in memory of Bonnie Heller (1966-2008).

AGRICULTURAL EXPORTS 100

COMMENTS FROM OUR GOVERNOR

I am pleased to introduce the Montana Agricultural Statistics yearbook. The yearbook is an accurate and valuable record of Montana's production history and demonstrates the diversity of Montana's agricultural economy. From cattle and hay to cherries and organic Kamut, Montana's number one industry is healthy and robust.

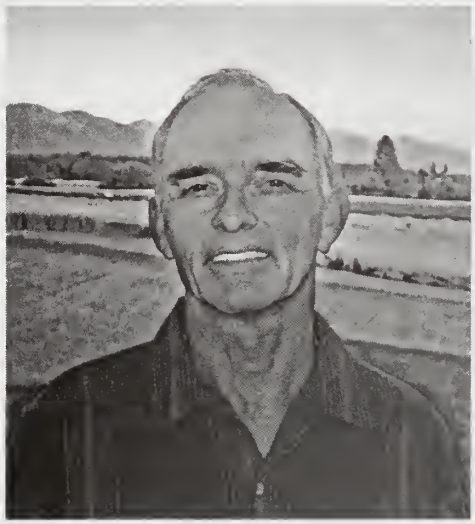
Research and innovation and will continue to result in new opportunities for both food crops and crops with great energy potential. The option of utilizing a single crop for both applications will add value to and improve the sustainability of the agricultural industry and continue to enhance Montana's leadership position in meeting the challenge of energy independence.

If you have ideas regarding business opportunities for Montana, use the comment form on our website, www.governor.mt.gov or give my office a call at (406) 444-3111. And, please stop by when you are in Helena - the door is always open.

Sincerely,

Brian Schweitzer, Governor

MESSAGE FROM THE DIRECTOR



The 2008 Farm Bill makes it more important than ever to maintain county-specific information on crops and agricultural production costs in Montana. The cost of agricultural inputs has gone sky high, increasing the risk farmers and their bankers must shoulder to produce food and feed grain crops such as wheat, barley and corn. New provisions in the farm bill will require producers to make choices about how to balance risks and rewards while responding to changing conditions.

Additional crop rotations will be needed to boost soil fertility and control invasive species with minimal reliance on crop chemicals and increasingly scarce and expensive commercial fertilizer products. Research on non-traditional approaches will be paramount in helping farmers revise the "tool kit" of agronomic, mechanical and economic choices in their farming operations.

Numbers in this report are generated from detailed surveys of producers. Updates are provided electronically and are available from the website: http://www.nass.usda.gov/mt. My thanks to producers who take time from their busy lives to answer the survey questions upon which these reports rely.

Sincerely,

Ron de Yong

Ron de Yong, Director, Montana Department of Agriculture

NOTES FROM THE DIRECTOR

The USDA, NASS, Montana Field Office is pleased to publish the 45th edition of Montana Agricultural Statistics. I believe 2008 will prove to be a good year for Montana's agricultural sector because demand for the high quality food produced in Montana remains strong. Organically produced food, bio-based fuels and carbon credits are providing new opportunities for farmers to add value to Montana's agricultural products. The new frontier in energy agriculture will provide many possibilities for farmers and ranchers across Montana in years to come.

The Census of Agriculture results will be out February! NASS will release Census data in both electronic and print formats. Thank you to all the farmers and ranchers across Montana that filled out the Census of Agriculture.

The USDA, NASS, Montana Field Office works in cooperation with the Montana Department of Agriculture, the Montana Wheat and Barley Committee, the Montana Alfalfa Seed Committee, Montana State University, and many other producers' organizations to provide valuable agricultural statistics.

I have enjoyed serving agriculture for 32 years, especially the 13 years working with the great farmers and rancher across Montana. Thank you to Montana's farmers, ranchers, and agribusinesses that made this publication possible through their willingness to supply basic agricultural information.

Peggy Stringer

Peggy Stringer, Director, USDA, NASS, Montana Field Office

MONTANA Department of AGRICULTURE

Department Mission

"To protect producers and consumers and to enhance and develop agriculture and allied industries."

Director Ron de Yong, (406) 444-3144
Central Services Administrator: Kathy Seacat
Attorney: Cort Jensen
Public Information Officer: Ron Zellar

Department Programs & Background

Montana Department of Agriculture operates some 30 programs, many funded entirely through producer fees. These include regulatory programs that protect producers, consumers, and the environment, as well as development and marketing programs to foster growth in Montana agriculture. The Director's Office also serves as an advocate for Montana agriculture in national and international forums and works to make the department's programs accessible to the public.

Agricultural Development Division

Deputy Director/Administrator: Joel A. Clairmont, (406) 444-2402

Ag Marketing & Business Development Bureau
- Domestic & International Marketing
- Growth Through Agriculture
- Bio-Products Innovation Centers

Wheat & Barley Bureau, Great Falls
- Producer funded research and marketing
- Hosts foreign buyers and delegations

Rural Development Bureau
- Agricultural Finance
- Agricultural Statistics
- Commodity Check-off Programs
- State Hail Insurance

State Grain Laboratory, Great Falls
- Tests grain for quality

Growth Through Agriculture supports entrepreneurs and has invested in 350 value-added projects since 1989, for a total investment of more than $10.6 million. Examples include:

- Marketing and development support for alternative crops such as Indian rice grass, gluten free hull-less oats, malting barley, Kamut, fruits, herbs, and vegetables.
- Processed foods – including Cream of the West cereals, Mexican wontons, and dried meat.
- Non-food and industrial products – including bio-lubricants, bio-diesel, and ethanol projects.

Rural Development finance programs have a combined loan portfolio of more than $3 million.

State Hail Insurance insured 1,686,000 acres in 2006, down from the previous year's record 1.9 million acres due to lack of crop moisture.

State Grain Laboratory annually performs tests for grade, protein, germination, baking qualities, vomitoxin, and other characteristics on more than 23,500 samples, including more than 500 on peas, beans, and lentils. The Great Falls facility is the only federally licensed grain lab in Montana.

Wheat & Barley Committee annually hosts an average of 13 foreign trade delegations and 63 visitors from seven nations that have an interest in purchasing Montana grains. The Committee represents producers on transportation issues, research, and market development.

Agricultural Sciences Division

Administrator: Greg Ames, (406) 444-2944

Analytical Laboratory Bureau, Bozeman
- Tests feed, pesticides, fertilizer, water

Commodity Services Bureau
- Anhydrous Ammonia
- Feed/ Fertilizer
- Grain Warehouses & Auditing
- Organic Certification
- Produce/ Seed/ Seed Potatoes

Pest Management Bureau
- Apiary/ Alfalfa Leaf Cutter Bees
- Export Certification
- Noxious Weeds
- Noxious Weed Seed Free Forage
- Nursery/ Quarantine
- Cooperative Ag Pest Survey

Technical Services Bureau
- Groundwater
- Licensing and Registration
- Pesticides
- Special Pesticide Registrations
- Vertebrate Pests

The Department:

- Licenses 450 pesticide dealers and registers 8,000 pesticide products.
- Licenses 8,000 private and 1,800 commercial and government pesticide applicators.
- Certifies 50 commercial honeybee operations and registers 5,059 apiary locations.
- Issues 750 plant health and export certificates, enabling products to be shipped to other states and countries. Licenses more than 1,000 nurseries to assure quality products.
- Issues 3,800 inspection certificates on a total of 275 million pounds of potatoes shipped for seed, processing, and fresh uses.
- Certifies 122 organic producer and handler operations.

Analytical Laboratory, operated jointly with MSU at Bozeman, reports about 77,000 individual test results on 3,100 feed, fertilizer, soil, plant tissue, and water samples.

Pesticide Disposal program assists homeowners, businesses, and producers in disposing of unwanted and unusable pesticides – a total of 289,666 pounds since 1994.

Fertilizer program inspects 60 anhydrous ammonia storage locations including 700 nurse tanks for the health and safety of workers and area residents. The department is distributing anhydrous ammonia tank locks under 2005 legislation to prevent thefts by drug manufacturers.

Noxious Weed Trust Fund annually distributes $2.1 million in grants for weed management, research, and education from automobile license weed management fund, federal grants, and interest received on Noxious Weed Trust Fund principal.

Board, Councils and Committees

The department receives advice from, and has attached to it, the following:

- Agriculture Development Council *
- Alfalfa Seed Committee *
- Cherry Advisory Committee
- Hail Insurance Board *
- Mint Committee *
- Noxious Weed Management Advisory Council
- Noxious Weed Seed Free Forage Advisory Council
- Noxious Weed Summit Advisory Council
- Organic Commodity Advisory Council
- Potato Advisory Committee
- Pulse Crop Advisory Committee
- Wheat & Barley Committee *

* Attached to department for administrative purposes only pursuant to Montana Code Annotated 2-15-121

Crop, Livestock, and Weather Digest, 2007

January: Temperatures varied widely in Montana during January. Stanford had the high temperature of 68 degrees, and West Yellowstone had the low temperature of minus 51 degrees. The state received below normal precipitation during the month. Thompson Falls received the most moisture at 2.84 inches. At month's end, winter wheat conditions were nearly the same as last year, with 54% rated good to excellent. Seventy percent of pastureland was open to grazing. Calving and lambing had just started by the end of the month.

February: Montana received moderate to heavy precipitation during the month. Swan Lake had the most moisture at 3.12 inches. Roundup, Hardin, and Rapelje reached the high of 64 degrees, and West Yellowstone had the low of minus 36 degrees. At month's end, winter wheat conditions were rated 6% excellent, 28% good, 64% fair, and 2% poor. Pastureland open for grazing decreased from last month, due to more snowfall. Most livestock were receiving supplemental feed.

March: Most areas of Montana received below normal precipitation during the first part of the month. Snow and rain fell across the state the last week. Billings received 7.5 inches of snowfall on March 30, breaking the old record of 3.7 inches on that date in 1989. Albion had the high temperature of 81 degrees, and West Yellowstone had the low of minus 25 degrees. At month's end, winter wheat conditions were 70% mostly good to excellent, significantly ahead of last year's 42% mostly good to excellent conditions. Calving and lambing were 62% and 39% complete, respectively.

April: Montana had moderate amounts of precipitation the first three weeks in April, but little moisture the last week. Temperatures for the month varied from 86 degrees at Hardin to 2 degrees at Gold Butte. At the end of the month, winter wheat conditions were 66% mostly good to excellent. Field tillage was 52% well underway, the same as last year. Topsoil moisture conditions were 85% mostly adequate to surplus. Calving and lambing were nearing completion by the end of the month.

May: The state received above normal precipitation at the beginning of the month, scattered precipitation during the middle, and above normal precipitation at the end of the month. Bozeman received 7.3 inches of snowfall on May 29, breaking the old record for that day of 4.0 inches in 1892. At the end of the month, winter wheat conditions were 74% mostly good to excellent. Range and pasture feed conditions were 69% mostly good to excellent, ahead of last year and the five-year average. Seventy-three percent of cattle and calves and seventy percent of sheep and lambs were moved to summer pastures by the end of the month.

June: Most areas in Montana received moderate to heavy precipitation until mid-month, when the weather turned hot and dry. Albion had the high temperature for the month at 106 degrees. Nashua received the most moisture at 3.95 inches. At month's end, winter wheat conditions were 68% mostly good to excellent, down from last month, but better than last year and the five-year average. Nearly all the cattle and calves and sheep and lambs were moved to summer ranges by the end of the month. Range and pasture feed conditions were 72% mostly good to excellent. Hay harvest was in full swing.

July: July was hot, the hottest July on record in Montana. Throughout the month, various cities had temperatures over 100 degrees. During the last week, Glendive and Wolf Point both reached 111 degrees. Most of the state had below normal precipitation. Conditions of spring grains declined, due to continued heat stress. Winter wheat harvest was 59% complete by month's end, compared to 78% last year and the five-year average of 35%. The first cutting of all hay was nearly complete. At month's end, summer pasture conditions were 10% excellent, 34% good, 33% fair, and 23% poor and very poor.

August: The hot weather continued until the last part of the month when high temperatures dropped into the 80s. Only a few places reported highs in the 90s. The state had below normal precipitation for August. Winter wheat harvest was complete by month's end. Spring wheat, barley, and oats harvest and the second cutting of alfalfa hay were nearing completion. The hot, dry weather affected small grain yields. At month's end, range and pasture feed conditions were 37% good and excellent, ahead of last year and the five-year average.

September: Temperatures were above normal the first part of September. Miles City had the high temperature of 103 degrees. During the last part of the month, average temperatures cooled into the 40s and 50s. Precipitation was limited the first half of the month. Above normal precipitation prevailed in most areas the rest of the month. Winter wheat seeding was 69% complete by the end of the month, slightly ahead of last year but nearly the same as the five-year average. Pulse and specialty crops harvest was nearing completion at month's end, and sugar beet harvest had just begun. The movement of livestock from summer pastures was well underway.

October: The state had above normal precipitation in many areas the first week. Precipitation was limited to moderate the rest of October. West Glacier had the most moisture for the month at 2.95 inches. Warm temperatures prevailed during the month. Winter wheat seeding was virtually complete by month's end, and fifty percent of the crop was rated good to excellent. Corn harvest for grain was well underway. Seventy-three percent of cattle and calves and seventy-nine percent of sheep and lambs were moved off summer ranges at the end of the month.

November: Montana received light to moderate precipitation during November. Temperatures were above normal the first half of the month and colder, near normal the second half of the month. Corn harvest for grain was eighty-seven percent complete at month's end. Fifty-one percent of the winter wheat crop was rated good to excellent, nearly the same as last month. Most livestock had been moved from summer pastures by month's end. Fifty-seven percent of cattle and calves and fifty-eight percent of sheep and lambs received supplemental feed.

December: Montana received below normal precipitation in most areas during the month. Temperatures were above normal for December. Jordan had the high of 67 degrees. Winter wheat had little snow cover, but wind and frost damage was minimal. By month's end, 33% of winter wheat was in good to excellent condition, behind last year's 58% good to excellent. Eighty-one percent of cattle and calves and eighty-four percent of sheep and lambs received supplemental feed, nearly the same as last year.

1/ Farms are places that had or would have had annual sales of agricultural products of $1,000 or more.

Agriculture Remains Montana's Number One Industry in 2007

A comparison of selected Montana industries shows Agriculture outpaced other industry sectors by $418 million. With higher grain prices, the value of crop production for 2007 increased to $1.3 billion, an increase of $378 million or 42 percent over 2006. The value of livestock increased in 2007 to $1.4 billion, a increase of $92 million from 2006. Government payments decreased 45 percent in 2006 to $38.4 million, down $46.4 million from 2006.

When comparing major industrial sectors in Montana, most sectors' receipts increased. Receipts for Mining showed the largest percentage increase, up 22 percent or $289 million above 2006. Agriculture showed the next largest percentage increase, at 17 percent, up $494 million from 2006. Gas and oil receipts were up $262 million from 2006 or 10 percent. Non-residential Travel showed the smallest increase in 2007, at 4 percent, up $128 million from 2006. Wood and Paper Products decreased 8 percent or $90 million below 2006.

Net farm Income 2/	487.3	714.5	867.3	309.3	747.0

1/ A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales.

2/ Value of agricultural sector production is the gross value of the commodities and services produced within a year. Net value-added is the sector's contribution to the National economy and is the sum of the income from production earned by all factors-of-production, regardless of ownership. Net farm income is the farm operator's share of income from the sector's production activities. The concept presented is consistent with that employed by the Organization for Economic Cooperation and Development.

1/ Marketing year average prices received by farmers are based on monthly prices weighted by monthly marketings during specific periods. These periods, by commodity, are as follows: July-June for wheat, oats, and barley; June-May for hay; October-September for corn; January-December for beef cattle, steers and heifers, cows, calves, sheep, lambs, milk, and wool. Annual prices are computed for the following commodities with marketing year as follows: December-November for hogs, chickens, and eggs; July-July for potatoes; production year for sugar beets; September-August for dry beans; and January-December for honey. Prices do not include allowance for CCC loans outstanding, purchases by the government or deficiency payments. -- Not available.

Montana Agricultural Exports Increased $168 million in 2007

The value of Montana's agricultural commodities exported during the fiscal year ending September 30, 2007, totaled $723 million, $168 million more than 2006. Wheat and Products remained Montana's leading export, making up 72.7 percent of the state's agricultural exports. Feeds and Fodders were Montana's second leading export accounting for 8.3 percent of the total. The Vegetables & Preparations category which includes dry beans, dry peas, lentils, and fall potatoes came in third with 7.5 percent of Montana exports.

All Montana agricultural exports showed an increase in 2007. Wheat and Products exports showed the largest change in value, increasing $111.9 million from 2006. Feeds and Fodders were up $20.5 million, followed Feed Grains and Products up $14.9 million, Vegetables and Preparations increased $14.7 million, and Seeds increased $2.3 million.

Montana dropped to fourth place among states exporting Wheat and Products for fiscal year 2007. The top wheat exporting state for 2007 was North Dakota, followed by Kansas, Texas, Montana, South Dakota, Washington, Minnesota, Colorado, Oklahoma, and Nebraska. Considering exports of all products, California remained on top, followed by Iowa, Texas, Illinois, Nebraska, Kansas, Minnesota, and Washington. Montana moved up from thirty-second place in 2006 for exports of all products to twenty-ninth place in 2007.

U.S. agricultural exports reached a record high in fiscal 2007 at $81.9 billion, $13.4 billion higher than the record set in fiscal 2006. The export value for Wheat and Products is up 38 percent over 2006 at $8.5 billion. Exports showed increases in all categories except Rice and Cotton and Linters. The largest increase in U.S. exports occurred in feed grains followed by Soybeans and Products and Wheat and Products. Wheat and Products remains the third largest U.S. agricultural export group in fiscal 2007 following Feed Grains and Products and Soybeans and Products.

Feed Grains and Products became the largest valued agricultural export commodity in 2007 at $11.8 billion—growing some $3 billion over fiscal 2006.
